FLUIGEN - 2026

What's inside

This book is the single source of truth for the Fluigen brand. If you design anything for us, start here. If something isn't covered, keep it simple and stay inside these rules.

[01]	Brand basics	(03)
[02]	Logo	(04)
[03]	Color	(10)
[04]	Gradients	(12)
[05]	Typography	(14)
[06]	Graphic elements	(16)
[07]	Imagery	(17)
[08]	Social media	(18)
[09]	Voice and copy	(20)
[10]	Applications	(21)
[11]	Web theme	(22)
[12]	Asset files	(23)

We automate the work that slows growing businesses down.

[WHO WE ARE]

Fluigen is an AI automation agency. We design and build systems that run a business process end to end, from the first trigger to the finished result.

[WHO WE SERVE]

Mid-market businesses in the US, UK, Canada, Australia, New Zealand and Europe that have outgrown manual work.

[WHAT WE PROMISE]

Outcomes, not jargon. Every project is judged by hours saved, errors removed or revenue protected.

Clear

Plain words. If a client needs a glossary, we failed.

Calm

No hype, no urgency tricks. The work speaks for itself.

Precise

Real numbers, clean layouts, nothing extra.

FLU from flow + GEN from generate = work that flows and keeps producing results.

[02 LOGO]

One clean flow out of many messy ones.

[THREE WAVY LINES]

The scattered, manual tasks a business juggles today.

[THE MERGE]

Fluigen connecting those tasks into one system.

[ONE STRAIGHT LINE]

A single, smooth process that runs on its own.

Four color versions

Black and white are the everyday versions. The gradient versions add a touch of teal for moments where the logo is the hero, like the website header or a cover.

Black
Default on white, Baseline and light gradient areas.

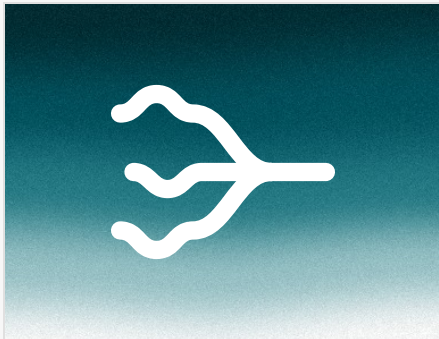

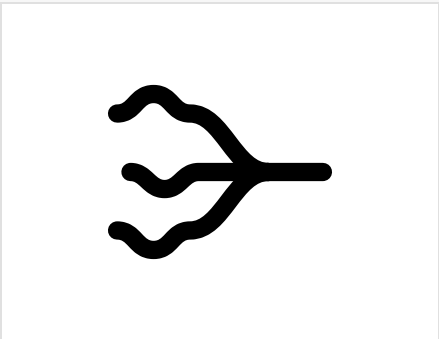

White
Dark backgrounds, photos and dark gradient areas.

Gradient
White or Baseline only. Website header, covers, proposals.

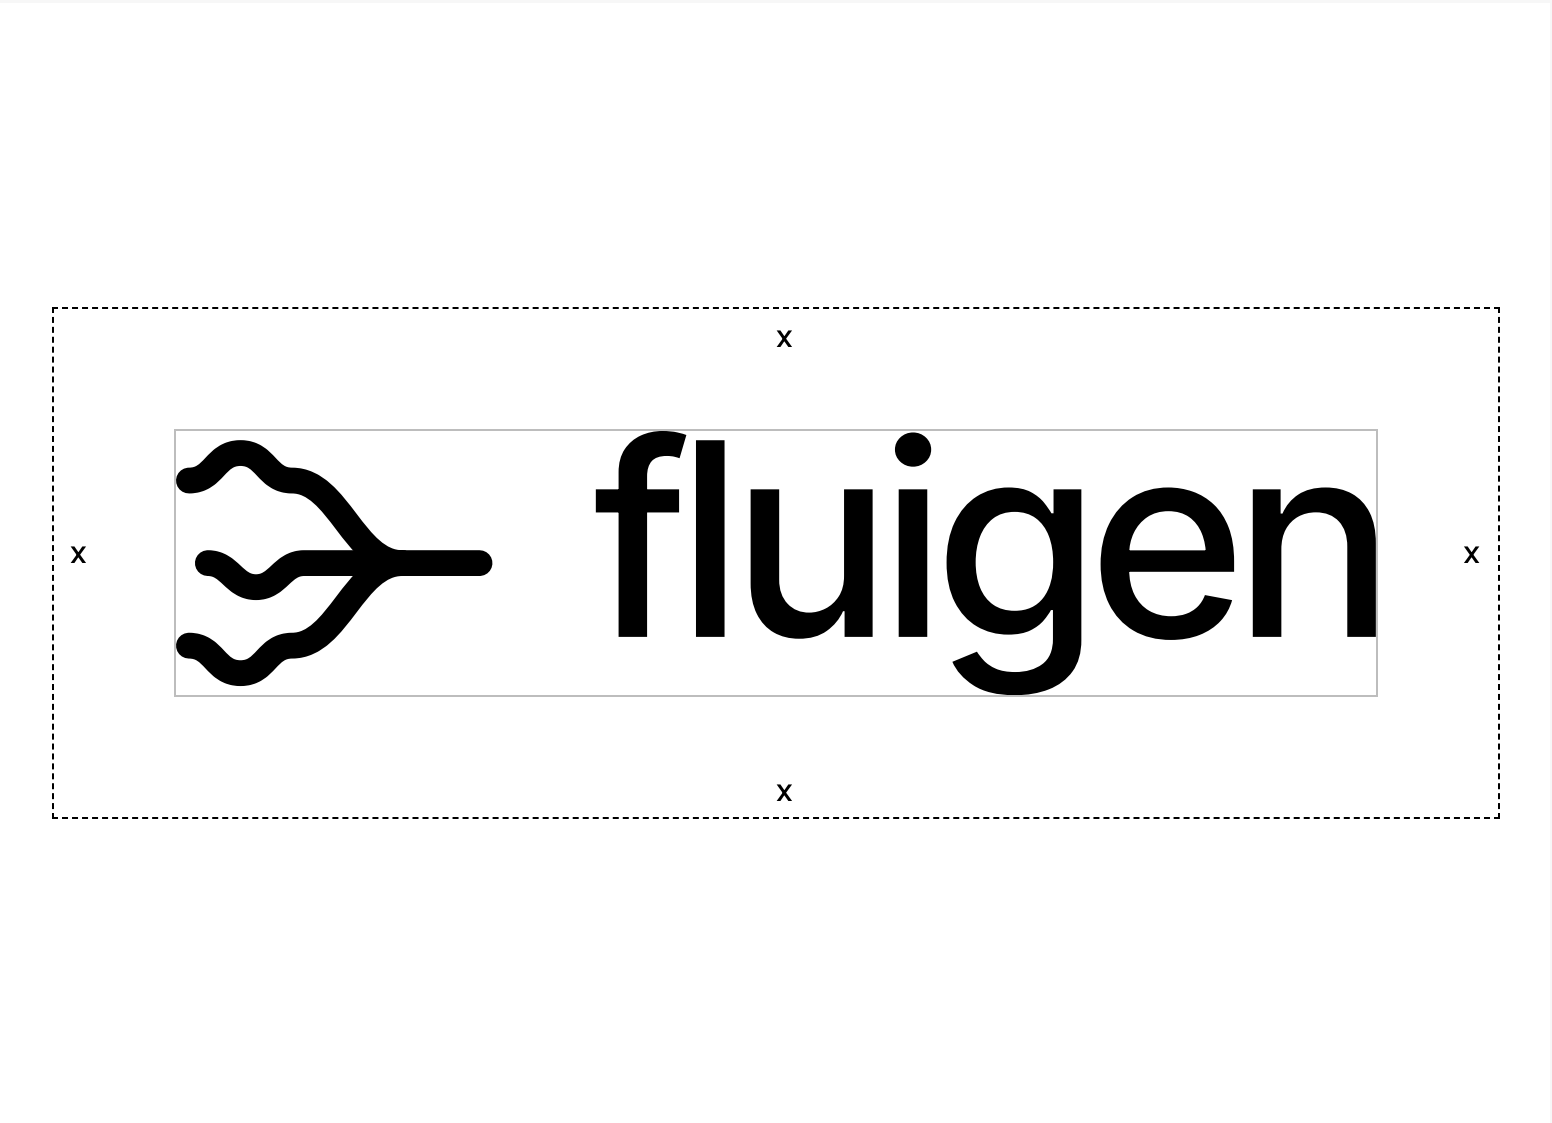

Gradient reversed
Substation, black or the dark part of a gradient.

Every version also comes as stacked, icon only and wordmark only. The app icon uses this exact icon, never a simplified one.

Clear space and minimum size

[CLEAR SPACE]

Keep empty space around the logo equal to **x**, half the height of the icon.
No text, edges or graphics inside it.

[MINIMUM SIZE]

VERSION	DIGITAL	PRINT
Full logo	120 px wide	30 mm wide
Icon only	32 px	8 mm
Below 32 px	Use the app icon (09)	

Which logo goes where

White Black logo

Baseline Black logo

Black White logo

Horizon gradient White logo on the dark part

Arch gradient Black logo on the light part

Edge gradient Black logo on the light part

Mist gradient White logo on the dark part

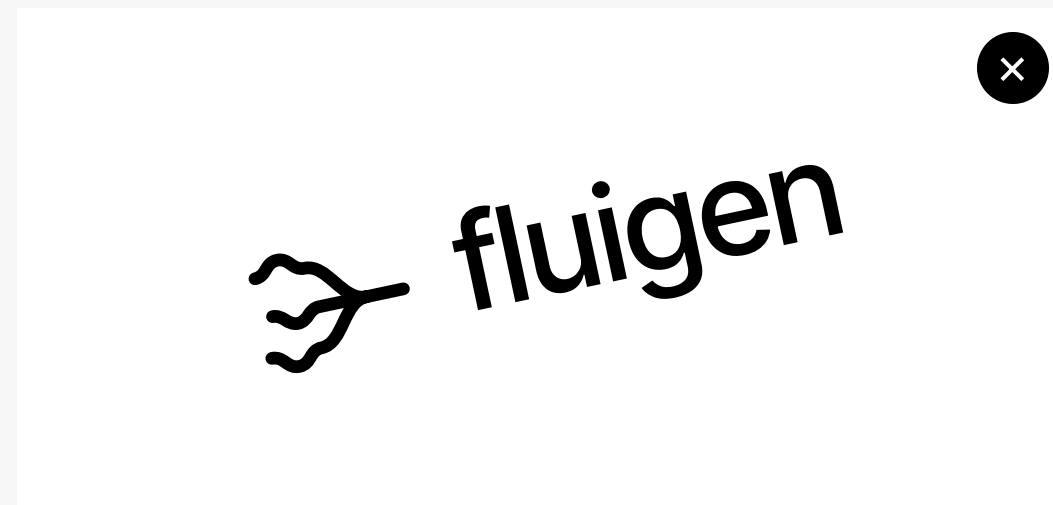

[THE ONE RULE]

Black logo where the background is light. White logo where it is dark. If you can't decide, move the logo, not the color.

Please don't

Don't stretch or squash it

Don't rotate it

Don't use colors outside the palette

Don't add shadows, glows or outlines

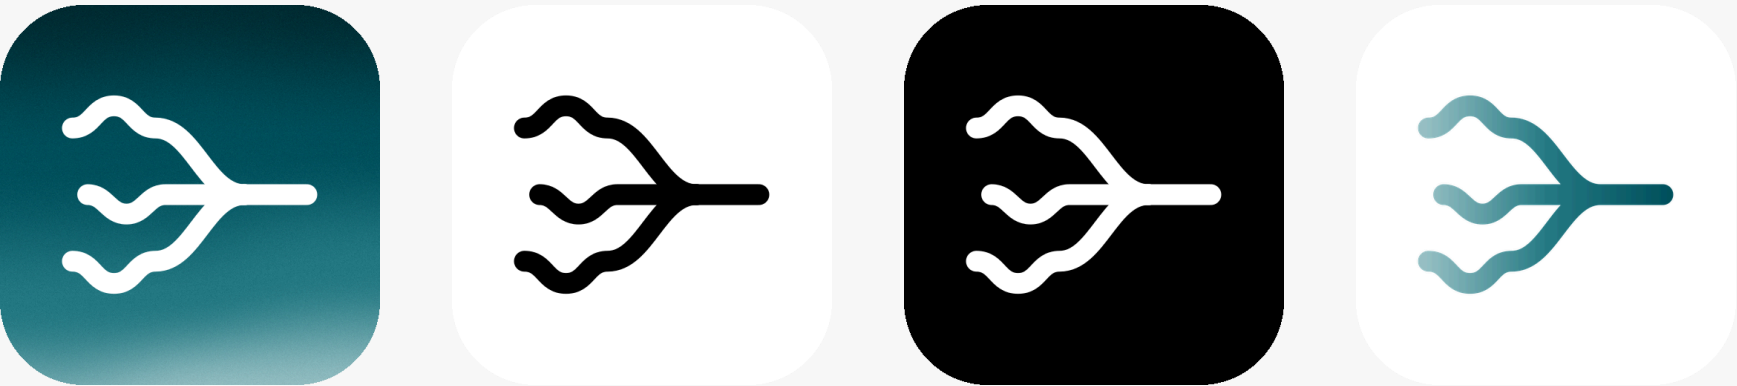

Don't put white on the light part of a gradient

Don't rearrange or retype the parts

App icon and favicon

App icons, favicons and profile pictures all use the exact logo icon. Upload the square files: Apple, Android and social platforms round the corners themselves.

WHERE	FILE
Browser tab	07-Website/favicon.ico
Phone home screen	07-Website/apple-touch-icon.png
Social profile photos	03-Social-Profile-Pictures/
App stores, tools	12-App-Icons/*-1024.png

[03 COLOR]

Color palette

Six colors, taken from a calm, cool palette. **[P.]** marks the primary colors, **[S.]** the supporting ones.

Baseline and black carry almost every layout. Vector and Substation appear mainly inside gradients, as light rather than paint.

[P.] Baseline

HEX #F7F7F7
RGB 247, 247, 247
CMYK 0, 0, 0, 3

[S.] Null

HEX #FFFFFF
RGB 255, 255, 255
CMYK 0, 0, 0, 0

[S.] Flux

HEX #97C1C5
RGB 151, 193, 197
CMYK 23, 2, 0, 23

[P.] Vector

HEX #267B85
RGB 38, 123, 133
CMYK 71, 8, 0, 48

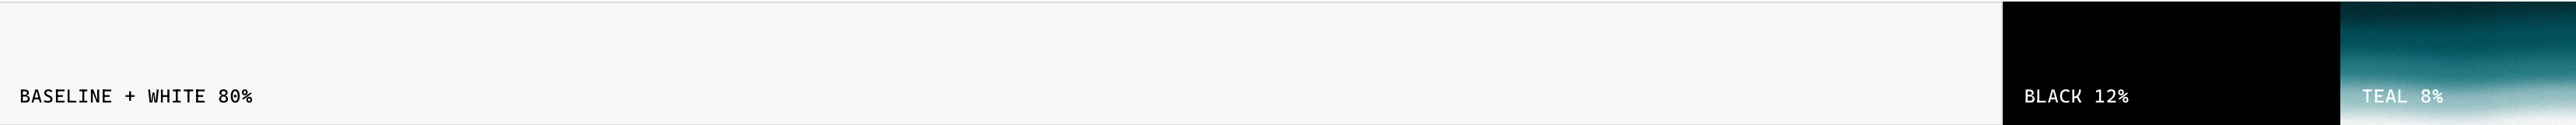

[P.] Substation

HEX #02525E
RGB 2, 82, 94
CMYK 98, 13, 0, 63

[S.] Core

HEX #000000
RGB 0, 0, 0
CMYK 0, 0, 0, 100

Color is light, not paint.

Teal only appears as a soft gradient, never as a flat block of color.

Type is black or white. Never set headlines or body text in teal.

Flat Vector is allowed only for tiny details: a thin rule, a hover state, a 2 px line.

Most of every layout is empty Baseline space.

[TEXT CONTRAST, WCAG]

	PAIR	RATIO	USE
Aa	Black on Baseline	19.6 : 1	Yes
Aa	Black on white	21.0 : 1	Yes
Aa	White on black	21.0 : 1	Yes
Aa	White on dark gradient area	8.9 : 1	Yes
Aa	Black on light gradient area	10.8 : 1	Yes
Aa	White on light gradient area	2.0 : 1	<u>Never</u>
Aa	Black on dark gradient area	2.4 : 1	<u>Never</u>

Four gradients. That's the whole system.

Horizon
Deep teal at the top dissolving into Baseline. Hero sections, covers, video end cards.

Arch
A soft column of teal rising from the bottom. Posters, business cards, a single focal point.

Edge
Teal bleeding in from one corner. Text heavy layouts that need only a hint of color.

Mist
A drifting full field, dark to light. Social covers and section openers.

How to make them feel fluid

Blur heavily. No visible edges. It should look like light through water.

Add fine grain at 3 to 5 percent. It stops banding and adds a printed feel.

Always fade into Baseline or black. Never end on a hard line.

Bleed off the edge. Let the glow leave the frame instead of floating in the middle.

One gradient per layout. Never stack two.

Use the ready-made files in the gradients folder before making new ones.

Hard stripes

Colors outside the palette

Flat teal blocks

Sharp floating blobs

Three fonts, one quiet voice

[HEADINGS + LOGO]

Inter Tight

Regular for headlines, Medium only for the logo. Big, tight and black. Most of the personality comes from size, not weight.

Aa Bb Cc 0123456789

[BODY TEXT]

Inter

Regular for paragraphs, captions and interface text. Made for screens and easy to read small.

Aa Bb Cc 0123456789

[LABELS + DATA]

Cascadia Code

Small labels, stats and micro text, often in capitals and square brackets. Never for paragraphs.

[01] 99.9% 24/7

All free on Google Fonts and available in Figma, Canva and Adobe. If Inter Tight is missing, use Inter. Never substitute Arial, Montserrat or Poppins.

Type sizes

[WEB]

STYLE	FONT	SIZE / LINE	WEIGHT, TRACKING
H1	Inter Tight	72 / 72	Regular, -3%
H2	Inter Tight	48 / 52	Regular, -2.5%
H3	Inter Tight	28 / 34	Regular, -1%
Body	Inter	18 / 28	Regular
Label	Cascadia Code	12 / 16	Regular, caps

[SOCIAL, 1080 PX WIDE]

STYLE	FONT	SIZE / LINE	WEIGHT, TRACKING
Headline	Inter Tight	84 / 84	Regular, -3%
Big number	Inter Tight	220 / 200	Regular, -5%
Body	Inter	30 / 42	Regular
Label	Cascadia Code	18 / 24	Regular, caps

Built to run
without you.

[HEADLINE]
INTER TIGHT REGULAR
SENTENCE CASE, BLACK

[06 GRAPHIC ELEMENTS]

Brackets, dashes and micro text

[PARENTHESES]

Big, thin round brackets frame a word, a date or the icon: (2026)

[DASH SEPARATORS]

Spaced short dashes link labels: FLUIGEN - 2026

[MICRO TEXT]

Small clusters of Cascadia Code in capitals, placed in quiet corners. They add a technical, precise texture.

[SHAPES]

Buttons and tags are pill shaped. Cards have a 20 px radius. No icon sets or decorative blobs.

OPERATIONS
AUTOMATED
END TO END

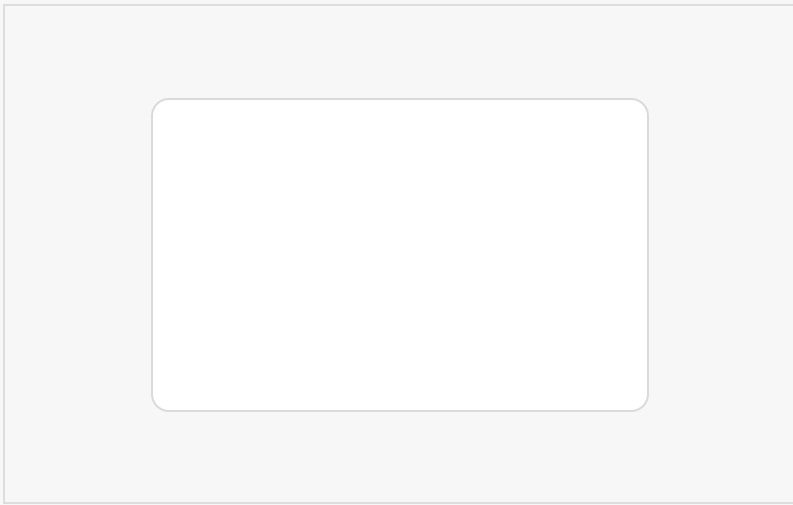

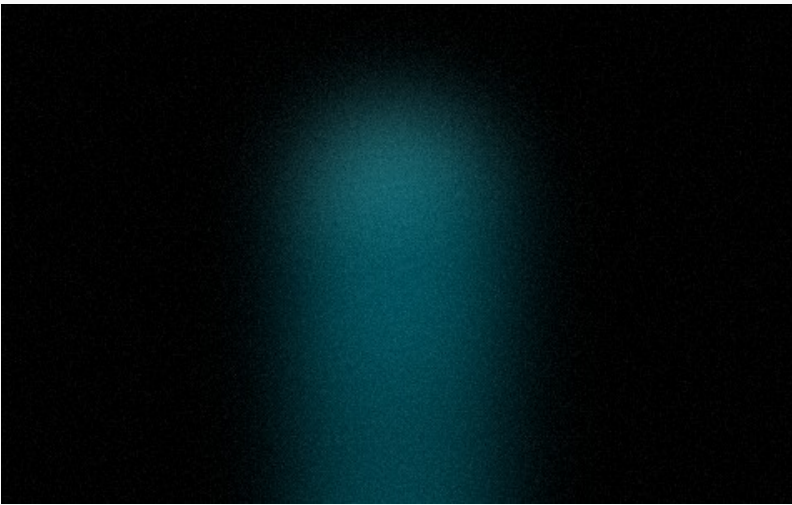

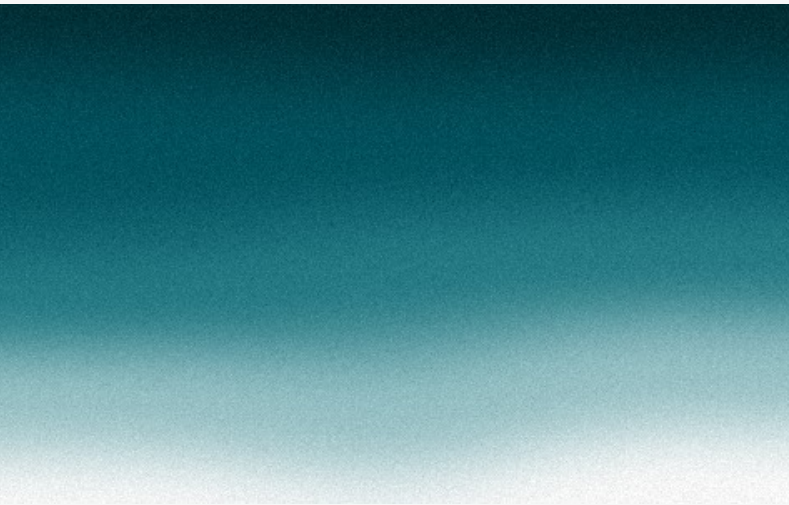

CASE - 2026

Calm, cool and mostly empty

[DO]

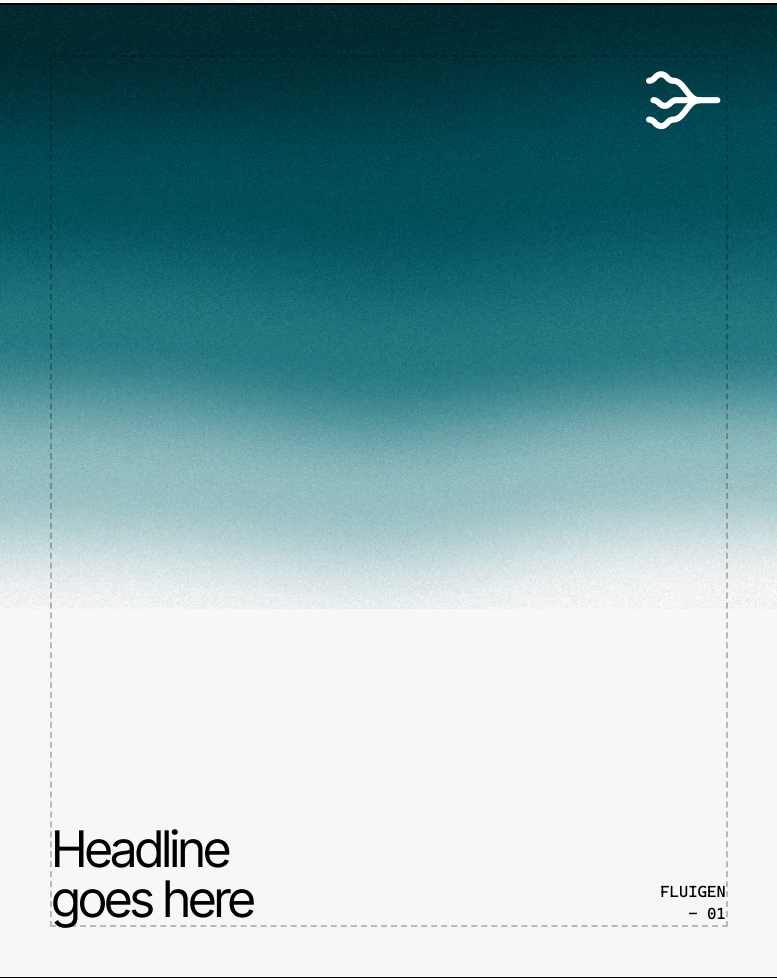

- Our own gradients as the main visual.
- Black and white or cool, desaturated photos with lots of space.
- Real screens and dashboards from our work, cropped tight on Baseline.
- Dark, quiet environments with one soft teal light source.

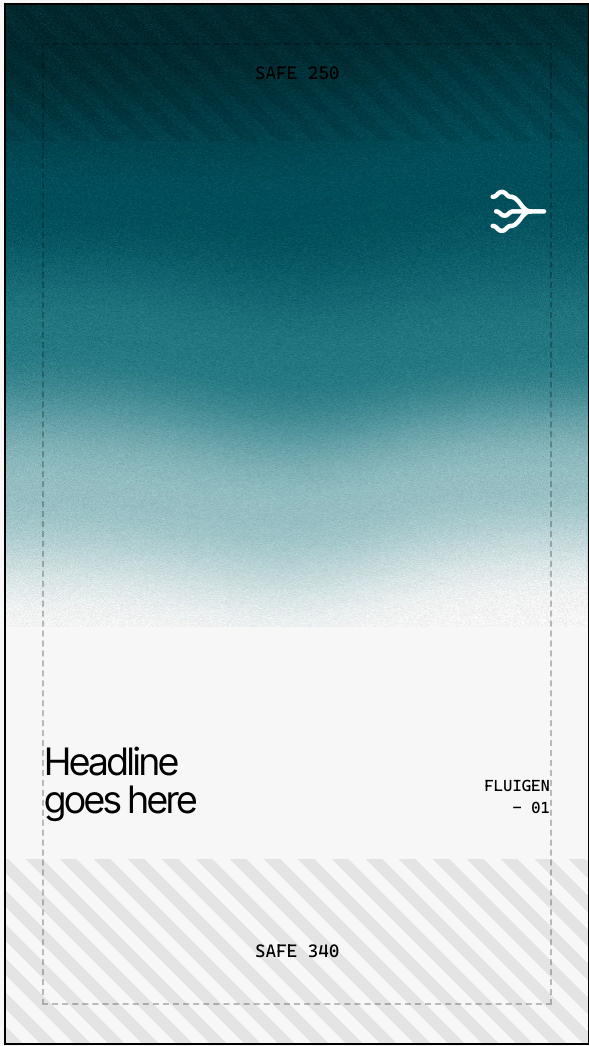

[DON'T]

- Robots, glowing brains, circuit boards or binary code.
- Stock handshakes and smiling teams pointing at screens.
- Neon purple "AI" art, lens flares, warm orange filters.
- Busy collages or more than one photo per post.

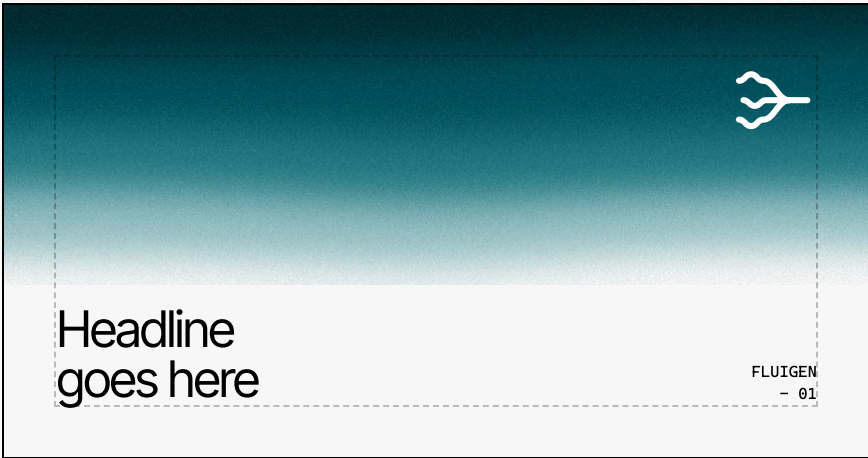

One layout, every format

Instagram and LinkedIn post
1080 x 1350 PX

Instagram story
1080 x 1920 PX

LinkedIn link image
1200 x 627 PX

[THE SPLIT LAYOUT]

Gradient on top, about 60 percent of the height.

Baseline strip below with a black headline, bottom left.

White icon in the dark part of the gradient, top right corner.

Micro text in Cascadia Code, bottom right of the strip.

72 px margin on all sides. Stories keep clear of the top 250 px and bottom 340 px.

Headlines of 8 words or fewer.

What good looks like

12

Platforms connected by one onboarding workflow

CASE STUDY
- 01

[GUIDE]

5 tasks every growing business should stop doing by hand.

fluigen

SWIPE - 01/06

We map the process before we build

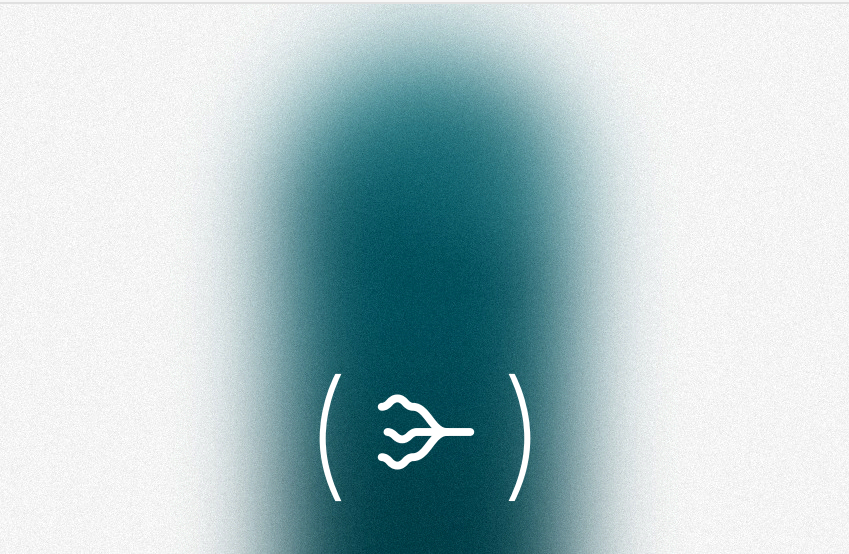

HOW WE WORK
- 03

Write like a smart person talking, not a brochure.

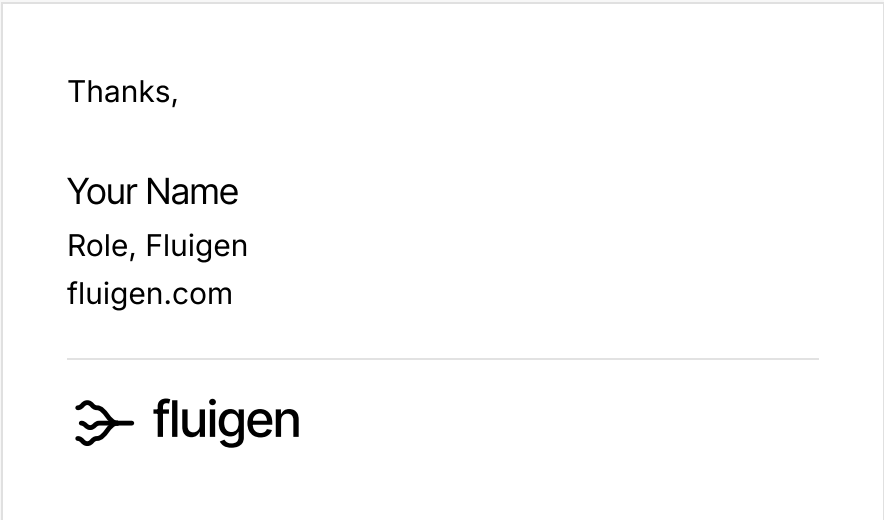

- Lead with the outcome.** What changes for the client, then how.
- Plain words.** If a 15 year old wouldn't get it, rewrite it.
- Specific beats impressive.** Real numbers, cities, tools.
- We, not I,** on all agency material.
- Sentence case** for headlines and buttons.
- No emoji, no em dashes,** no exclamation marks in headlines.
- No AI buzzwords:** leverage, revolutionize, seamless, cutting-edge, unlock.

SAY THIS (STYLE EXAMPLES)	NOT THIS
We cut your onboarding from three days to twenty minutes.	We leverage cutting-edge AI to revolutionize your workflows.
Your team stops copying data between tools.	Seamless synergy across your entire tech stack.
Here's what it costs to keep doing this by hand.	Don't miss out! Transform your business today.
We built this for a recruiting firm in Toronto.	We help businesses of all sizes succeed.

Business card, email and proposals

Business card
85 x 55 MM

Email signature
Text plus a small black logo. No banners, quotes or social icons.

Proposal and case study cover
A4 PORTRAIT

Website building blocks

```
--baseline: #F7F7F7;   --null: #FFFFFF;   --core: #000000;
--flux: #97C1C5;   --vector: #267B85;   --substation: #02525E;
--font-head: "Inter Tight";   --font-body: Inter;
--font-label: "Cascadia Code";   --radius-card: 20px;
```

- Page background Baseline. Text black.
- Primary button: black pill, white text. Secondary: black outline.
- One gradient per page, usually the hero or the final call to action.
- Cards are white on Baseline, 20 px radius, no shadow.

[12 ASSET FILES]

Where everything lives

FOLDER	WHAT'S INSIDE
00-START-HERE.pdf	Which file to use for every platform
02-Logo/	4 lockups, black and white, SVG, PDF, PNG, JPG
03 to 05	Profile pictures, covers, banners, highlight covers
06-Gradient-Backgrounds/	4 gradients in 10 sizes
07 to 12	Website, email, video, fonts, colors, app icons

[FILE NAMING]

fluigen-[type]-[version]-[size].[ext]

Use SVG for the logo wherever the tool allows it. Never screenshot the logo or recreate a gradient by eye.
